

**Affinity**, in etymology *affinity* is the opposite of *infinity*. These two words have the same root coming from the Latin: *finis = end*.  
“Affinity” meaning is near to the “finis” e.g. close to the “zero point” in a before assumed space.

On the other hand, from the Latin, *affinis = connected with*, having things in common, and it is utilised to interpret the effective possibility that some substances can or cannot mix together, in terms of *sympathies* and *antipathies*.

Also, it can mean a natural attraction of feeling or kinship. A relationship by marriage.
